# Data Vault

## Success Story *focus*

ADDRESSING THE NEEDS OF BUSINESS STAKEHOLDERS AND PLANTING THE SEEDS FOR AN ADAPTABLE FUTURE.

*The Data Vault 2.0 System enabled QSuper to move their Enterprise Data Warehousing efforts forward in a rapid and agile fashion. QSuper ingested 7 systems, 6500 data items (rapidly being expanded) into their DV2.0 EDW with the use of 3 principal ETL templates in just 8 months.*

## QSuper lowers TCO of their EDW using Data Vault 2.0

QSuper is Queensland's largest and oldest super fund. Queenslanders have trusted them to look after their retirement for 100 years. They have consistently invested in I.T. over the years and are recognized as an industry leader in funds management.

QSuper realized that their performance exceeded industry standards in many areas, yet they sought further improvement. As David Bowen, Chief Information and Technology Officer for QSuper put it:

*"In an industry undergoing an unprecedented rate of change, DV2.0 is essential to our being able to support quality, time-critical decision making; and now across a much wider set of information than we have ever been able to manage."*

QSuper is dedicated to maintaining the highest quality investments and lowest possible fees to their members.

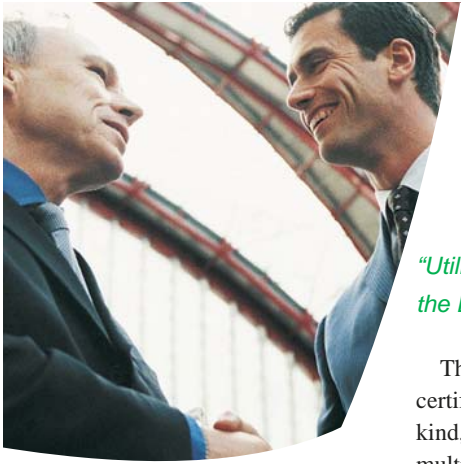

This corporate value extends in to their EDW efforts, and according to Nols Ebersohn: *"The DV2.0 platform provides measurable efficiencies by virtue of the standardization of processes and effort required to maintain, develop & test an EDW."*

These increased efficiencies are in-line with Qsuper's commitment to deliver the best services and outcomes to its members.

## MARKET WATCH

The EDW market is driving the needs for automation, ease of use, and sustainability. Rapid absorption of changes is necessary for the EDW teams to **keep up** with business. Data Vault 2.0 provides the best method for achieving enterprise value, while maintaining a sustainable asset and lowering total cost of ownership. In addition, Data Vault 2.0 enables agility at all levels of the project by leveraging well defined standards, and widely adopted best practices. # Kick Start and Accelerator Education Packages

*"Utilizing the training and kick-start package, we jump started the DV2.0 effort which was invaluable." Nols Ebersohn*

There is no substitute for good education and knowledge. Having an instructor with the proper background and implementation experience can make all the difference.

QSuper is dedicated to educating their members. We are in good company. We believe that a solid education in Data Vault 2.0 is invaluable.

Dan provided excellent coaching and training, focusing on creating a self-sufficient team. He inspired the team to work to goals, in processes, output and quality. His contribution was of exceptional value to the team. DAVID BOWEN

The enhanced DV2.0 certification class is one of a kind, offering education at multiple levels including NoSQL, Big Data, project management, risk assessment and mitigation strategies.

Engage **LearnDataVault.com** for the world's best education in Data Vault 2.0.

As David states: *"The whole team was able to go on the same journey and use our own business opportunity to apply the teaching. By the end of the training and kick start package*

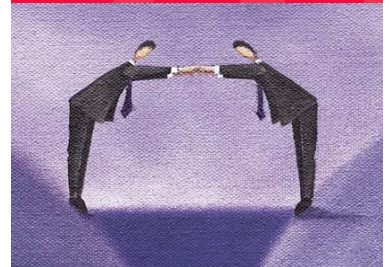

*we had a team with a common vision and approach – as well as business model."*

Proper training has enabled QSupers' team to do incredible things in short time frames with small teams.

*"DV2.0 training provides all the patterns and sample code, so the learning curve for developers is contracted."*

Nols Ebersohn

## SMARTER DESIGN: Experience vs. Discipline

"We have diverse applications with overlapping data coverage, multi-latency data arrival, all changing often due to the nature of the superannuation landscape in Australia, requiring the support for rapidly changing business rules.

DV2.0 deals with it with ease and elegance."

Nols Ebersohn,  
Manager of Information Architecture,  
QSuper

LearnDataVault.com

26 Prospect Street  
Saint Albans, VT 05478

<http://LearnDataVault.com> is your best resource for on-line training, assessments, and consulting based kick start packages in the Data Vault 2.0 model, methodology, and architecture.

You can reach us at:
